The Annual Meeting of Stockholders will be held on April 25, 1950. Notice of the Meeting and Proxy Form will be mailed to each holder of Common Stock on or about April 5, 1950

TO THE STOCKHOLDERS AND EMPLOYEES OF NATIONAL TOOL COMPANY

Net sales during 1949 were about thirteen per cent less than those in 1948. The output of the principal product, special cutting tools, fell approximately ten per cent. As such tools are indispensable to most metal working industries, the Company's pace is largely dependent on the rate of activity in this broad field. In view of the fact that the index for the metal working industries, in general, showed a greater proportionate drop in 1949, it is believed that National Tool Company again strengthened its position as a leading manufacturer of special cutting tools.

Net income for the year, $95,361, was derived entirely from operations. Though the net income for the year 1948 was $110,154, it included a non-recurring item of $13,091 representing interest earned on a refund of Federal Income and Excess Profits Taxes. Earnings per share in 1949 amounted to over forty-one cents on the 229,591 shares outstanding, in comparison with forty-eight cents per share earned in 1948.

In 1949, twenty cents per share, in four quarterly dividends of five cents each, was paid to over 1100 stockholders. A single dividend of fifteen cents per share had been paid in each of the preceding three years. Recently a cash dividend of five cents per share was declared for the first quarter of 1950.

The financial position of the Company was again strengthened during the year. Working capital at December 31, 1949, amounted to $763,053, and the ratio of current assets to current liabilities was almost five to one. Cash, United States Treasury Securities and Accounts Receivable alone totaled $614,389, or more than three times current liabilities. There are no bank loans outstanding at the present time, and two banks have extended current borrowing privileges considered ample for any working capital needs.

During the latter part of 1949, a $250,000 ten year, mortgage loan was negotiated with an insurance company. The purpose of the loan was to obtain funds to be used in making improvements in manufacturing facilities, and to place the Company in a position to develop broader diversification of its products and markets.

A step in this direction was the conclusion, during the year, of a contract with Bell & Howell Company of Chicago, Illinois, for the exclusive distribution of their new precision checking instrument, the Pocket Comparator. Literature describing this instrument is enclosed.

During 1949, cost factors remained more stable than in any post war year. Early in 1950, however, these began to show an upward trend which seems likely to continue throughout the year. Advances in sales prices, if required, will be made only to the extent warranted by increases in costs.

Aggregate orders entered since January 1, 1950 to the date of this report, are substantially greater than those received during the corresponding period of last year, and the backlog of unfilled orders is considerably larger than that existing in the middle of 1949.

The loyalty of the employees during the past year has contributed greatly to the progress made, and we are confident that a continuation of their cooperative spirit, coupled with contemplated improvements and economies in methods and procedures, will enable National Tool Company not only to maintain, but to advance, its position.

For the Board of Directors

HARRY W. BARKLEY

President

CLEVELAND, 13

ACCOUNTANTS' CERTIFICATE

National Tool Company:

We have examined the balance sheet of National Tool Company as of December 31, 1949 and the related statement of income and earnings retained for use in the business for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the accompanying balance sheet and statement of income and earnings retained for use in the business present fairly the financial position of the Company at December 31, 1949 and the results of its operations for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.
